1. Upon admission to the facility, you will be given a classification based upon your charges, current and/or past behaviors, and any special needs or management issues. You will meet with a Classification Officer who will interview you and make a housing assignment for you in an appropriate housing unit.
2. You will be assigned a classification level of Minimum, Medium, or Maximum. Your assigned classification level will determine your housing assignment. Your classification may determine your participation in programs.
3. Classification Levels:
  - **Administrative Segregation or Special Management** refers to inmates who must be separated from the general population because they are dangerous, either to other inmates or staff, or they are in danger from other inmates. These inmates must live in cells.
  - **Maximum** refers to inmates who have assaultive or aggressive disciplinary records. Maximum security inmates must live in cells. These inmates leave their cells, for the most part, only for showers, visitation and limited recreation.
  - **High Medium** means the inmate must live in a cell, with few exceptions.
  - **Low Medium** refers to inmates who may live in a cell or dorm with few exceptions.
  - **Minimum** refers to inmates who may live in dorms or cells. They may be assigned to facility work details. (Excluding ICE detainees).
4. Your classification will be reviewed at a minimum every 30 days.
5. Your classification may also be reviewed:
  - a. If you are being considered for Special Management status.
  - b. Prior to release from Disciplinary/Administrative Segregation.
  - c. Prior to release from Medical or Special Needs Housing.

Decisions of the Classification Review may be appealed to the Assistant Director of Corrections by following the same procedure and time frame.
8. Failure to follow rules and regulations of the facility may result in changes to your classification level. If staff determines that you were engaged in misconduct an immediate review of your current classification will be initiated. This could result in your housing assignment being changed. If at any time you are placed into a segregation unit, your classification assignment will be reviewed prior to your release back into general population.

Administrative segregation is special housing for certain inmates who:

- Are pending investigation and/or hearings for disciplinary violation;
- Need medical observation;
- Are a security risk; and/or,
- Need protective custody.

Disciplinary segregation is a special housing unit for certain inmates who:

- Are a serious disruption in general population;
- Require secure physical confinement; and/or,
- Have received a disciplinary sanction as a result of a disciplinary hearing.

K. **Use of Force** Officers may use physical force only after all reasonable efforts to resolve an inmate situation have failed. Officers shall use as little force as necessary to:

- Gain control of the inmate;
- Protect and ensure the safety of inmates, staff and others;
- Prevent serious property damage; and
- Ensure the security and orderly operation of the facility.

Physical restraints shall be used only under specified conditions to gain control of an inmate who is endangering himself, herself, or others.

L. **Evacuation Drills.** Per local, state and federal laws, we are required to perform evacuation drills. At this facility, we perform no less than one drill per month. These drills are not designed to inconvenience you, but rather to insure that you know where the exits are located in case of an actual danger such as: a fire, gas leak, civil disaster or other dangers. In your housing unit is a diagram showing you the location of all fire exits and which exits to use, study this diagram located in your housing unit, carefully, your life may depend on it.

M. **Flammable, Toxic, and Caustic Materials.** Chemicals used to clean Housing Units are non-flammable, non-toxic and non-caustic. Inmates use flammable, toxic and caustic materials only under staff supervision.

N. **Sexual Assault Information**

The Hall County Department of Corrections has a zero tolerance standard regarding abusive contacts or acts within the Correctional Center. Inmates should expect a facility that is free from any form of abuse to include:

- Physical/sexual assault
- Physical/sexual pressuring
- Extortion (pressuring for personal property, charging rent, demanding sexual favors or money)
- Physical/sexual intimidation or manipulation
- Retaliation/retribution

Inmates who engage in the above cited prohibited acts are subject to disciplinary action and/or criminal prosecution. Inmates who are determined to be a threat to staff or other inmates will be considered for Administrative Segregation or Administrative Confinement placement through the inmate classification process.

All cases of sexual assault will be referred for criminal investigation and possible prosecution.

## **SEXUAL ASSAULT**

Sexual assault as defined by HCDC is the carnal knowledge, oral sodomy, sexual penetration with an object, or sexual fondling of a person, forcibly or against the person's will; or where the victim is incapable of giving consent because of their youth or their temporary or permanent mental or physical incapacity; or when achieved through the exploitation of the fear or threat of physical violence or bodily injury.

Sexual assault will be separated into two categories of inmate-on inmate sexual violence and all incidents of staff sexual misconduct.

1. Completed non-consensual sexual acts include:
  - Contact with any inmate without their consent, or with an inmate who is unable to consent or refuse;
  - Contact between the penis and the vulva or the penis and the anus involving penetration, however slight;
  - Contact between the mouth and the penis, vulva or anus
  - Penetration of the anal or genital opening of another person by a hand, finger, or other object.
2. Inmate-on inmate abusive sexual contacts include:
  - Contact with any inmate without their consent, or with an inmate who is unable to consent or refuse;
  - Intentional touching, either directly or through the clothing if the genitalia, anus, groin, breast, inner thigh, or buttocks of an inmate;
3. All sexual acts involving staff, volunteers or contracted staff are considered misconduct including:
  - Any behavior of a sexual nature directed toward an inmate;
  - All completed, attempted, threatened or requested sexual acts with an inmate;
  - Any incident of intentional touching of the genitalia, anus, groin, breast, inner thigh, or buttocks with the intent to abuse, arouse, or gratify sexual desire;
  - Incidents of indecent exposure or invasion of privacy for sexual gratification.
  -

## **SELF PROTECTION**

Inmates should take all reasonable measures to protect themselves. Inmates have the right to defend themselves provided they take reasonable measures to avoid conflict / confrontations / altercations by leaving the immediate area, soliciting staff assistance and taking a defensive posture during altercations.

Be aware of situations that make you feel uncomfortable. Trust your instincts. If it feels wrong, LEAVE.

Don't be afraid to say "NO" or "STOP IT NOW."

Walk and stand with confidence. Many rapists choose victims who look like they won't fight back or are emotionally weak.

Casual nudity and talking about sex may be considered a come on, or make another inmate believe that you have an interest in a sexual relationship.

Do not accept commissary items or other gifts from other inmates. Avoid placing yourself in debt to another inmate; this can lead to the expectation of repaying the debt with sexual favors.

Avoid secluded areas. Position yourself in plain view of staff members. If you are being pressured for sex, report it to any staff member immediately.

### **WHAT TO DO IF YOU ARE SEXUALLY ASSAULTED**

#### **If the attack just happened.....**

As soon as it is safe to do so, REPORT THE ATTACK IMMEDIATELY TO A STAFF MEMBER. The longer you wait to report the attack, the more difficult it is to obtain the evidence necessary for a criminal investigation. The assault can be reported to any staff member.

**Do not** shower, brush your teeth, use the restroom, or change your clothes. You may destroy important evidence.

**Do** request immediate medical attention. You may have serious injuries that you are not aware of, and any sexual contact can expose you to sexually transmitted diseases.

#### **Later on.....**

Seek the support of a trusted friend, family member, or staff member. The days ahead can be traumatic and it helps to have people who care about you and supporting you.

Professional help is available. Any nonconsensual sexual activity is degrading. Mental Health Staff within the facility are available to help inmates recover from the emotional impact of sexual assault.

### **DID YOU KNOW?**

- People of all ages, economic classes, races and levels of education, who live in all different types of neighborhoods are victimized.
- Sexual Assault usually does not happen spontaneously-perpetrators know what they are doing.

- Sexual Assault is a deliberate action usually used to make another person feel helpless, humiliated, and degraded, and in turn, makes the rapist feel powerful.
- 84% of victims know their assailant in some way.
- Nearly one-third of sexual assault victims will develop stress disorders as a direct result of the assault at some time in their lifetime, increasing their risk for serious alcohol and drug abuse problems.
- The National Violence Against Women Survey estimated that 302,091 women and 92,748 men were sexually assaulted in the 12 months prior to the assault. Of those who were assaulted in the previous 12 months, women experienced 2.9 assaults and men experienced 1.9 assaults on average.
- 1 in 5 men will be sexually assaulted in their life. Most of these will be heterosexual male-on-heterosexual male assaults.

O. **Contraband:** Contraband will be defined as any item within the Department of Corrections facilities or the immediately surrounding areas that have not been issued to the inmate, purchased from commissary, approved for possession within the facility or altered from its original purpose.

1. Nuisance Contraband Sometimes inmates accumulate large quantities of approved items that can threaten security, fire safety or sanitation. The most common items that may be considered nuisance contraband are food, newspapers clothes, photographs, and personal mail. This handbook lists the types and quantities of items that may be kept by inmates in their cell. Commissary items will be stored in the inmate's property bag and are subject to inspection. Approved items which exceed authorized limits found in a cell area, will be released by the inmate, placed in their property, or in the event the owner cannot be determined, the items may be discarded.
2. Altered Contraband Items that are issued by the facility or purchased from commissary, but then altered from their original form for a different use, will be considered contraband, removed and discarded. Examples such as hair combs with missing teeth, a crucifix or cross made from threading material, newspaper stories taped to the wall, and toilet paper balls are some items which would be considered as being altered.

MEDICAL EDUCATION**

This information is designed to assist patients in identifying and treating common ailments. It is strongly recommended that a patient seek medical attention if a problem persists or you experience additional symptoms.

**COMMON COLD**

The common cold is caused by many different types of viruses and is not serious. The usual symptoms include sneezing, stuffy nose, watery nasal discharge, scratchy throat and cough. You may feel achy, tired and have a headache. Colds are not cured by taking antibiotics like penicillin. A cold must run its course. Symptoms are usually worse the 2<sup>nd</sup> & 3<sup>rd</sup> days and should stop within 4-7 days. A cough may last longer than this, especially if you smoke.

Adults average 2-4 colds per year. Colds usually occur more in the fall and winter. The viruses that cause colds are spread mostly by drainage from the nose, coughing and sneezing. You should cough and blow your nose into paper (Kleenex or toilet paper) and throw it into the trash can right away. Try not to get really close to anyone coughing or sneezing who does not cover his/her mouth. **ALWAYS** wash your hands after you blow your nose or sneeze.

Do the following if you have a common cold:

1. Drink lots of fluids especially clear fluids such as water.
2. Stop smoking. Smoking can make your cold worse. Smoking can cause respiratory problems and cancer.
3. May take 2 Regular Strength Tylenol tablets for fever, headache, and aches and pains associated with a cold. Antibiotics are not indicated for treatment
4. Rest as much as possible.

You may need some medications to relieve some of the symptoms. If your symptoms get worse put in a sick-call request to see the medical department.

## **NAUSEA AND VOMITING**

Nausea and vomiting can have many causes. The stomach flu is a common cause and does not last for more than 24-36 hours. Diarrhea may also develop. If you are sick to your stomach or throwing up, you should do the following:

### **TOOTH DECAY & GUM DISEASE**

Tooth decay and gum disease begin with plaque. Plaque is a sticky, invisible film that contains bacteria. It is the major cause of tooth decay and gum disease. It is constantly forming over the teeth.

How does plaque cause cavities?

1. When you eat sweet foods, the bacteria in plaque combines with sugar to form decay acids that attach to the enamel on your teeth.
2. The cavity grows larger as it enters the dentine.

3. Decay weakens the enamel further and reaches the sensitive layer of the tooth.
4. If decay is not checked, an abscess may occur or the bone may become infected.

### **How does plaque cause gum disease?**

1. Plaque collects beneath the gum line and irritates the gum tissues. This may cause your gums to bleed when you brush.
2. If plaque isn't removed, it becomes hardened and forms tartar increasing the irritation to your gums.
3. Plaque will begin to destroy the tissue holding the gums to the teeth.
4. Brush to remove plaque.
5. Prevent tooth decay and plaque by brushing.
6. Hold your toothbrush at a 45-degree angle to the gum line.
7. Brush back & forth with short strokes, covering 1-2 teeth at a time.

4. Stop smoking.

Return to the nurse if conditions get worse or you have no relief.

### **SPRAIN**

Stressing or twisting a joint or body usually causes a sprain. Swelling usually occurs and can cause pain. Do the following if you have a sprain:

1. Keep the injured area elevated for 48 hours. This decreases the swelling and throbbing.
2. Use cold-water cloths on the area for 24 hours and avoid using.

4. Notify the medical unit if numbness, tingling, cold or blueness appears to the area below the injury.

### **SKIN RASH**

Many things can cause rashes:

- plants
- chemicals
- medications
- infections

Often it is impossible to identify the cause of a rash. The treatment for a rash is to remove what is causing the rash and to relieve symptoms.

Do the following if you have a rash:

1. Wash or bathe in cool water only.
2. If you know what it is, avoid the cause of the rash.
3. Notify medical unit if symptoms of infection occur:
4. Increased redness or swelling, pus formation, heat, red streaks, increased pain or the rash is spreading.

## **ACNE**

Acne is a build up of oil at hair roots and oil glands. Acne may be blackheads, whiteheads or pimples. Do the following if you have acne:

1. Shampoo hair 2-3 times weekly in cool or barley warm water.
2. Use dandruff shampoo. Make sure you rinse out all the shampoo.

11. Use the cream as directed by the medical staff.
12. Notify the medical staff if any of the following occur:
  - increased redness
  - increased swelling
  - heat
  - pus formation
  - red streaks
  - increased pain.

## **INSOMNIA**

Some of the things that you can do for yourself if you are having trouble sleeping are:

1. Reduce and/or stop drinking caffeine drinks. These include coffee, brown tea, colas and some other soft drinks.
2. **DO NOT** take naps during the day, at count or during the evening.
3. Exercise during the day to help tire you out. This will also help reduce stress.
4. Go to bed at the same time each night. When you are drowsy and can't sleep, get up and read a book or write a letter until you get drowsy; then go back to bed. You may need to repeat this procedure several times.
5. Get out of bed at the same time each day.
6. Discuss your problems with the staff chaplain, or other mental health professionals if available.

Over time, the ideas listed above should help you get your sleep problems under control. Your body has a natural "clock" built into it; sometimes it needs to be corrected. If you have had sleep problems for a long time, or were using drugs and/or alcohol prior to incarceration, it will take time for you to adjust. If you are new to the jail or are getting out soon, you will probably have some sleeping problems. Medications won't cure the problem. Time and effort from you probably will.
